The architecture takes its lead from the traditional image of the towns on the Mexican Coast with tiled sloping roofs supported by wooden beams and only natural materials used on the floors and the walls, so as to create a simple and contemporary space which fits perfectly with the lifestyle of Punta Mita.

All built in one level which makes it very comfortable and wheelchair friendly.

On entering the house, the central patio with its water mirror feature is the element around which the surrounding areas are organized, generating an atmosphere of tranquility and serenity that is also reflected in each one of the private areas and the areas which are accessed from the central patio.
